

5 Reasons **IRON HORSE** recommends **PRO-STRIDE APS** for your horse's joint injections

1

Safety:

Pro-Stride uses cells in your horse's own body to harvest their natural healing abilities. The injection is steroid-free and does not trigger an immune response.

2

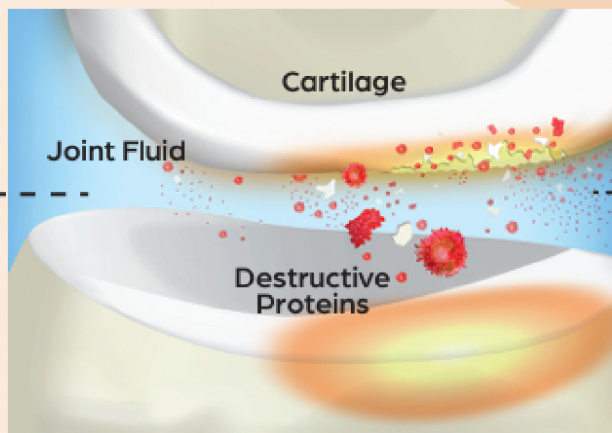

Convenience:

Processing can be done at your barn and takes less than 30 minutes from start to finish.

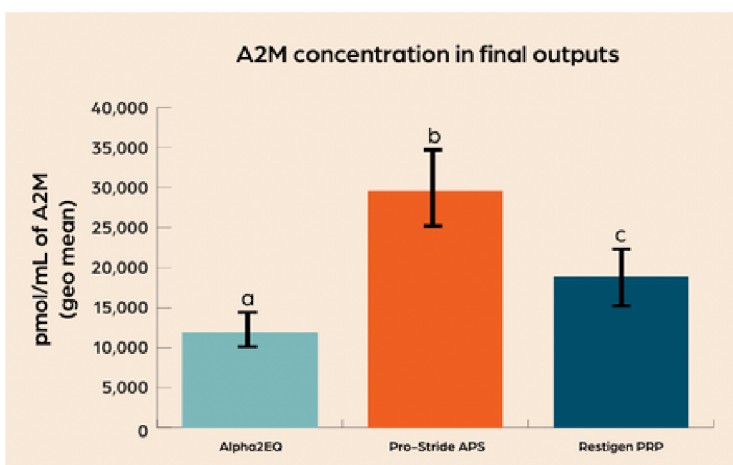

3

Cutting-Edge Science:

Pro-Stride stops joint inflammation by inhibiting pro-inflammatory cytokines that break down cartilage and cause pain.

Inflammation can break down cartilage, resulting in permanent damage to the joint and chronic pain.

4

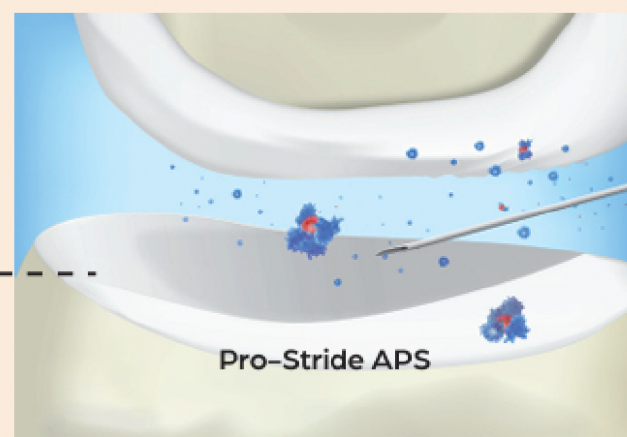

Multiple Benefits:

Contains more alpha 2 macroglobulin (A2M) in the product than Alpha2EQ. Treats common issues such as osteoarthritis, synovitis and tendonitis.

5

Proven Results:

Joint disease can prevent your horse from reaching their full potential. In a study, 95% of patients that were treated with Pro-Stride had greater than 50% improvement in 2-4 weeks that lasted up to a year.

Pro-Stride APS restores the healthy environment of the joint with natural anti-inflammatories and healing growth factors.¹
